A Simple LaTeX Document

Your Name

May 22, 2024

Abstract

This is a simple LaTeX document created to demonstrate the basics of LaTeX. It includes a title, an abstract, sections, and some basic text formatting.

1 Introduction

This is the introduction section. LaTeX is a typesetting system that is widely used for producing scientific and mathematical documents due to its powerful handling of formulas and bibliographies.

2 Basic Text Formatting

You can make text **bold**, *italic*, or underlined.

3 Mathematics

LaTeX is excellent for typesetting mathematics. For example, here is an inline equation: $E = mc^2$. And here is a displayed equation:

$$\int_0^\infty e^{-x^2}\, dx = \frac{\sqrt{\pi}}{2}$$

4 Figures

You can also include figures in your document. Here is an example of how to include a figure:

5 References and Hyperlinks

You can add references and hyperlinks to your document. For example, visit LaTeX Project for more information.
